Application/Control Number: 09829779

Art Unit: 1616

The elected composition comprising dibutyryl cAMP, caffeine, forskolin, auxin, and Nethanolamine is not allowable. See 35 U.S.C. 103(a). The election / restriction requirement is final.

## Claim Rejection under 35 U.S.C. 103(a)

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-4,6,8,9,15,16,31-33,40-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ishioka et (Plant and Cell Physiology, 1990, vol. 31 no. 1 pp 91-97), Suzuki et al (JP 62175402; 8/1/87), Jiang et al (CN 1116898; 2/21/96), and Mecca (US 2382326; 8/14/45) or Feng (CN 1033232; 6/7/89). Ishioka teaches plant growth promoting agents comprising dibutyryl cAMP, forskolin, and theophylline. See abstract. Ishioka does not teach plant growth promoting agents such as N-ethanolamine or auxin or caffeine. However, Suzuki teaches a composition comprising N,N-dimethylethanolamine as a plant growth promoter. See abstract. Jiang teaches a plant growth regulator comprising auxin. See abstract. Mecca or Feng teaches that caffeine is a plant growth stimulant / enhancer. See Mecca's column 1 line 21- column 2 line 3; See Feng's abstract. It would have been obvious to one having ordinary skill in the art to combine the prior art teachings to arrive at a single composition comprising dibutyryl cAMP, forskolin,

Application/Control Number: 09829779

Art Unit: 1616

theophylline, N,N-dimethylethanolamine, auxin, and caffeine. One would have been motivated to

Page 3

do this in order to make a composition that would have been effective in plant growth

development.

Telephonic Inquiry

Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Alton Pryor whose telephone number is (703) 308-4691. The examiner can

normally be reached on Monday through Friday from 8:00 a.m. to 4:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Thurman Page, can be reached on (703) 308-2927. The fax phone number for this Group is (703)

308-4556.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the Group receptionist whose telephone number is (703) 308-1235.
